RE: Data Analyst Internship Role

Dear Team,

I am writing to apply to the Data Analyst at the suggestion of your colleague Anil. After a recent meeting with Mr. Anil and learning more about Google and the position, I believe my educational background in Analytics coupled with my prior experience and strong interest in Google's core Products and Services make me an ideal candidate for this position. Please accept this as my application.

During my education at Northeastern University, I learned about the intricacies of the Data Analysis, Data Science, and DBMS. I am particularly interested in technology and recently received high praise for my presentation detailing the attributes of NYC Street Tree 2015 Census Data. Additionally, I also do participate in Northeastern Data Analytics Club and other Student Associations for the past year and enhanced my skills.

I have an overall work experience of 2.25 years as a Software Developer and my work involved Data Analysis, Front-end Web Application Development, and Python Web Scraping at an MNC called MOURI Tech. I am well skilled with the Python, SQL, and Tableau and I am confident I could use my skills, talents, and experiences to succeed in this role.

I also published 2 research papers in the journals

- Sunil Raj Thota & 5 Co-authors (March 2018). Smart Trash Can Monitoring System using IoT - Creating Solutions for Smart Cities. IRJET Journal, Vol. 5 - Issue. 3
- Sunil Raj Thota & 2 Co-authors (May 2017). CRYPTOGRAPHY (ZOVMQLDOXMEV) -The Art of Writing or Solving Codes. IJARSE Journal, Vol. 6 – Issue. 5

I am composed that my skills and experience qualify me as a strong candidate for this role. I am eager to discuss my candidacy further with you and would welcome the opportunity to interview with you. Thank you for your time and consideration and I look forward to your response.

Sincerely,

Sunil Raj Thota
